

PRESENTATION

VANKOR®

VANKOR

VANKOR® company was founded in 2007 as manufacturer of bathroom furniture. In this sphere company achieved excellent results, but after 7 years, during hard military situation on the East of Ukraine and Crimea, there was highly difficult relations with Russia, the owner decided to change main line of business. New project started since 2014 and lasts till today. It is manufacturing of products from composite materials.

Limited liability company “VANKOR” is legal and registered trade mark in Ukraine.

HISTORY

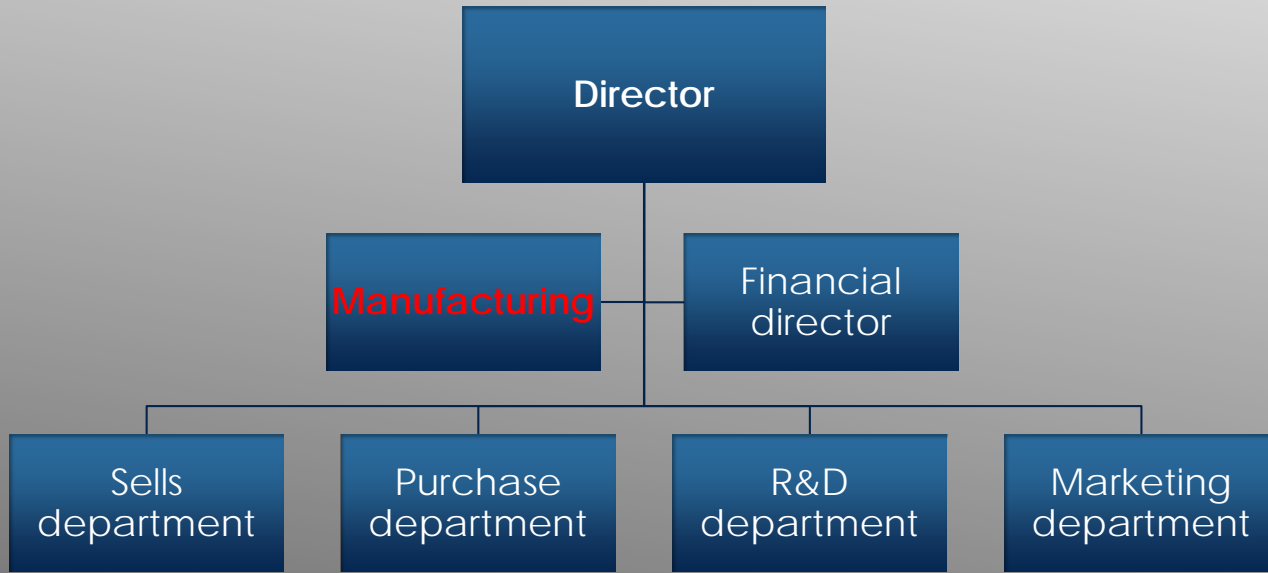

We choose quartz for the manufacturing. Not granite or marble.

Quartz is the mix of the silicone and oxygen and very solid material, second only to diamonds and topaz. It is exceptionally strong, durable, resistant to chemicals and strong acids.

Thanks to this material, QUARTZ sinks are significantly superior in durability and strength of the other products, even better than granite or marble.

MAIN MATERIAL

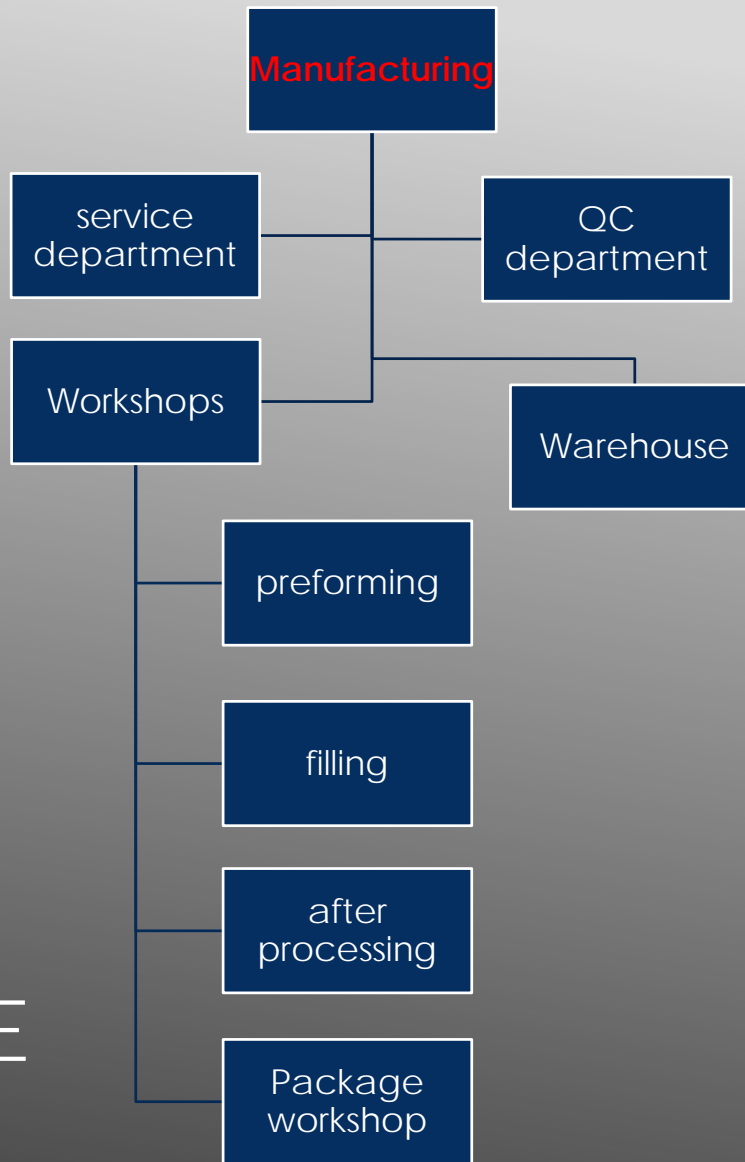

STRUCTURE

MNF STRUCTURE

Current productivity - 3000pcs per month (November 2018)

Maximum - 10000pcs per month

All facilities are located on areas for:

- manufacturing 1400sq.m
- warehouses 600sq.m

GOALS

Company received all needed Ukrainian papers and certificates.

Here is the Conclusion of the state sanitary expertise. In nearest future certificate ISO 9001 is in progress.

General competitors in the Europe are Franke, Blanco and Aqua Sanita.

Main advantages are:

- lack of analogues in production technology in Ukraine
- precise geometry, durability and resistance to the hits and high temperature 280°C
- flexible approach to cooperation, the ability to create custom-made design
- excellent European quality for the best price

MAIN ADVANTAGES

Our sinks have:

1. High mechanical strength, scratch-resistant . For domestic use, the sink is indispensable, household utensils do not harm the sink
2. High temperature resistance. Our quartz products are able to withstand temperatures up to 280 ° C and easily withstand the temperatures that surfaces in everyday life are exposed to. You can put a hot frying pan or pour boiling water, the sink will have its original appearance.
3. The absence of emission of harmful substances is absolutely safe for food, washing undergo a full cycle of production.
4. Do not change their color throughout the entire service life because of dyes are not used in production.
5. Has non-porous dense structure (thanks to our technology), which does not allow liquids and bacteria to penetrate into the product, therefore stains do not linger on surface. Stains resistance is one of the main demand of the consumer.
6. Easy to operate, it is enough to use conventional detergents and a sponge, and also to adhere to the operating rules, which are described in detail in the passport for the product.
7. Pleasant to the touch, accumulate heat, muffle the sound of water have a beautiful, modern aesthetic appearance and the correct geometry, our experts have made every effort for this.

We offer our clients a wide range of models, modern and practical color solutions, and most importantly, durability, consistent quality. Manufacturer's warranty is 5 years. In addition, customer loyalty is supported by an optimal market price, working conditions and acceptable production time.
